-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

**Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by  
Takahashi et al. (2004/0114245).**

Takahashi et al. discloses the invention as claimed. Figs. 1-29C show the objective lens used in an optical head having: the convex lens (L2, see for example Fig. 17); and the chromatic aberration correcting optical element (L1, see For example section [0097] and [0190]), wherein a center of gravity of the objective lens is arranged substantially on a straight line connecting supporting points for the objective lens (see for example section [0138] that describes that both lenses are centered as shown in Figs. 17 and 18, and section [0189 and 0190] describes that the design will cancel out the resonant oscillation on application of the focusing servo and tracking servo is enabled by adjusting d2 to shift the position of center of gravity of the objective lens 15,

which is the lens combined from the first lens L1 and the second lens L2, which is therefor taken to be same as the recited center of gravity arrangement), as set forth in the claims. The reference further teaches the frame (58) for supporting the convex lens and chromatic aberration optical element, as set forth in claim 2; the convex lens has a one-element lens (see Fig. 17), as set forth in claim 3; and the convex lens has a two-element lens (see Figs. 19, 20, 22, 24, 26 and 28), as set forth in claim 4. See the description of the apparatus and figures for further details relating to the limitations as set forth in the claims.
